

The Avian First Aid Kit

Be prepared for small emergencies.

2-25-2004

Forearmed is forewarned when it comes to avian emergencies. Prepare a first aid kit expressly for your pet bird. Some items to include are: a cauterizing agent (such as Kwik-Stop, flour or cornstarch), scissors, gauze, hemostats, needle-nosed pliers, a small hospital cage (an aquarium or brooder), a heating pad, a towel, extra bird food and bottled water.
