

What's It Saying?

Read your bird's body language to know what it is thinking.

By Jessica Pineda

Though birds are capable of talking, your bird won't be able to tell you exactly how it's feeling. Birds have another way of communicating though: body language! Learning to interpret your bird's body language is easy; you just need to know what to look for. Follow our bird body-language guide to find out what bird is saying. **For the full article, pick up the 2010 issue of Birds USA or click here to buy the issue.**
